Characteristics

EGG STUCCO GND 04 is a concentrated paste to be applied by spatula on any leather type that presents cuts, holes and deep degraivings, particularly on leather intended for the production of upholstery and fancy leather.

The aim of the process is to improve the finished leather selection removing in this way the above mentioned faults generally present on the unfinished leathers.

All information and data herein are accurate at time of this publication and, anyway, they are not to be taken as a warranty. EGG reserves the right to modify them without notice. Work condition and type of material can affect the final results and for this reasons it is responsibility of users to apply such suggestions to their own particular purpose.
