

## EGG WAIL 15

---

<b>Appearance</b>	: Solid from pale yellow to green
<b>Constitution</b>	: Homogeneous mix of high quality waxes
<b>Dry content</b>	: 95% $\pm$ 2
<b>Solubility</b>	: Not water-soluble

### Characteristics

EGG WAIL 15 is a specific medium-hard wax to realise pull-up effects.

EGG WAIL 15 confers to the leather a very strong pull-up effect, which permits “after sandblast embossing” to obtain an excellent sealing on buffed grain.

The leathers treated with EGG WAIL 15 hold a dry touch and can be appropriatedly finished without adhesion problem.

### Method of Use

Previously warm melting, EGG WAIL 15 is used by roller coater with warmed roller at about 45-50°C of temperature.

After application, it's suggested to hang up the leathers at natural conditions for minimum 12 hours and follow with ironing or sandblast operation.

The combination of EGG WAIL 15 with EGG WAIL 39 is helpful because it permits a lowering melting point and lets an easier application with less spreading calories contribution.

Consequently, the cleaning of the rollers is facilitated.
