

EGG WAIL 3112

Appearance	: Ivory emulsion
Constitution	: Synthetic and natural waxes emulsion
pH	: 7.5 ± 0.5
Dry content	: $12.5\% \pm 1$
Charge	: Anionic

Characteristics

EGG WAIL 3112 is an emulsion of very fine synthetic and natural waxes, suitable for the finishing of full grain leathers.

Even if it is penetrating, EGG WAIL 3112 gives to the leather a very natural, slippery, waxy and talcous touch, with a slightly matt effect.

By using it in the grounds, EGG WAIL 3112 allows a finely smoothly levelling effect of the surface, which does not overload the grain.

EGG WAIL 3112 has a good adhesion and does not alter the colour of the drum dyeing. With leather with a rough grain, the use of EGG WAIL 3112 is advisable for its softening and filling action. The use of EGG WAIL 3112 actively helps to solve the problem of "low grain".

Method of Use

EGG WAIL 3112 can be applied on any kind of leathers as finishing auxiliary in bases or seasoning coats and in the formulation of final touches.

Thanks to its thin film, softness and delicate touch, EGG WAIL 3112 is really suitable on very soft leathers, as nappa for footwear and garments.

EGG WAIL 3112 can be used in combination with EGG WAIL 3113, when the leather has strong absorption and higher degree of levelling are required.
