

## EGG PRO N 43

---

|                     |                           |
|---------------------|---------------------------|
| <b>Appearance</b>   | : Clear yellow liquid     |
| <b>Constitution</b> | : Modified proteic binder |
| <b>pH (sol.10%)</b> | : $8.0 \pm 1$             |
| <b>Dry content</b>  | : $20\% \pm 2$            |
| <b>Charge</b>       | : Anionic                 |

### Characteristics

EGG PRO N 43 is a shiny polyamide binder which improves the wet and dry fastness; the resulting swelling resistance is an other important property.

EGG PRO N 43 has very good filling power with high heat ironing reactivity.

EGG PRO N 43 gives a transparent, brilliant and medium-hard film.

### Method of Use

Due to its sealing and fastness properties EGG PRO N 43 can be used on casein finishing and also in resin articles.

EGG PRO N 43 can be used together with other EGG PRO products in glazed and polished finishing, and in particular in inter-medium effects and in final top in order to have very full and long life glosses.
